

Meet the Mantis Digital Loupes

The future of 3D Visualization for surgery is here

Low-profile screens

Unimpeded view of your surroundings

20X zoom, with focus and pan

Control with our foot pedal

True 3D vision

Natural 3D with no eye strain or fatigue

No more neck strain!

Eliminates need for direct field of vision, so user can position head in any direction

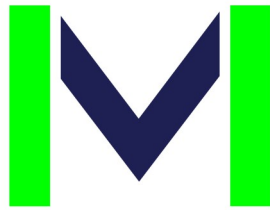

Mantis Imaging Station

Mobile vision unit with our 3D camera head that streams live 3D video from the operating field to the Mantis glasses.

Includes shadow-reducing LED lighting, anti-glare lens, foot pedal controls, and touch-screen.
